DMH is bringing the future...**TODAY**

Supporting a Better Tomorrow...Today

DMH is helping erase the stigma of mental health...**TODAY**

DMH is bringing more services to the community...**TODAY**

# Mission

Supporting a better tomorrow by making a difference in the lives of Mississippians with mental illness, substance use disorders and intellectual/developmental disabilities one person at a time.

# Vision

We envision a better tomorrow where the lives of Mississippians are enriched through a public mental health system that promotes excellence in the provision of services and supports.

# Core Values & Guiding Principles

## PEOPLE

We believe people are the focus of the public mental health system. We respect the dignity of each person and value their participation in the design, choice and provision of services to meet their unique needs.

## COMMUNITY

We believe that community-based services and supports should be available and easily accessible in the communities where people live. We believe those services and supports should be designed to meet the particular needs of the person.

## COMMITMENT

We believe in the people we serve, our vision and mission, our workforce, and the community-at-large. We are committed to assisting people in improving their mental health, quality of life, and their acceptance and participation in the community.

## EXCELLENCE

We believe services and supports must be provided in an ethical manner, meet established outcome measures, and be based on clinical research and best practices. We also emphasize the continued education and development of our workforce to provide the best care possible.

We believe it is our responsibility to be good stewards in the efficient and effective use of all human, fiscal, and material resources. We are dedicated to the continuous evaluation and improvement of the public mental health system.

We believe that services and supports are the shared responsibility of state and local governments, communities, family members, and service providers. Through open communication, we continuously build relationships and partnerships with the people and families we serve, communities, governmental/ non-governmental entities and other service providers to meet the needs of people and their families.

We believe the public mental health system should act in an ethical, trustworthy, and transparent manner on a daily basis. We are responsible for providing services based on principles in legislation.

We believe awareness, education, and other prevention and early intervention strategies will minimize the behavioral health needs of Mississippians. We also encourage community education and awareness to promote an understanding and acceptance of people with behavioral health needs.

We believe it is important to embrace new ideas and change in order to improve the public mental health system. We seek dynamic and innovative ways to provide evidence-based services/supports and strive to find creative solutions to inspire hope and help people obtain their goals.

We believe in respecting the culture and values of the people and families we serve. We emphasize and promote diversity in our ideas, our workforce, and the services and supports provided through the public mental health system.

# How to Seek Help

For more information about services or if you or someone you know needs help, call the **Mississippi Department of Mental Health's Helpline at: 1.877.210.8513**. Staff are available to assist you around the clock.

Through the Office of Consumer Support you or members of your family can:

- Receive information about other mental health, intellectual and developmental disabilities and substance use services available in Mississippi.
- File a formal grievance, which will be followed up on and responded to by staff in DMH's Office of Consumer Support.

You can also find additional information about services and supports at DMH's Web site [www.dmh.ms.gov](http://www.dmh.ms.gov).

If you or someone you know is at risk for suicide, contact the **National Suicide Prevention Lifeline at 1.800.273.TALK (8255)**

# What is Recovery?

Recovery means something different to everyone. Recovery is a process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential.

## THE 10 FUNDAMENTAL COMPONENTS OF RECOVERY

**SELF-DIRECTION:** To the highest degree possible, consumers lead, control, exercise choice over, and determine their own path of recovery by optimizing autonomy, independence, and control of resources to achieve a self-determined life.

**INDIVIDUALIZED & PERSON-CENTERED:** There are multiple pathways to recovery based on an individual's unique strengths and resiliencies as well as his or her needs, preferences, experiences (including past trauma), and cultural background in all of its diverse representations.

**EMPOWERMENT:** Consumers have the authority to choose from a range of options and to participate in all decisions—including the allocation of resources—that will affect their lives, and are educated and supported in so doing.

**HOLISTIC:** Recovery encompasses an individual's whole life, including mind, body, spirit, and community.

**NON-LINEAR:** Recovery is not a step-by-step process but one based on continual growth, occasional setbacks, and learning from experience.

**STRENGTHS-BASED:** Recovery focuses on valuing and building on the multiple capacities, resiliencies, talents, coping abilities, and inherent worth of individuals.

**PEER SUPPORT:** Mutual support—including the sharing of experiential knowledge and skills and social learning—plays an invaluable role in recovery.

**RESPECT:** Community, systems, and societal acceptance and appreciation of consumers—including protecting their rights and eliminating discrimination and stigma—are crucial in achieving recovery.

**RESPONSIBILITY:** Consumers have a personal responsibility for their own self-care and journeys of recovery.

**HOPE:** Recovery provides the essential and motivating message of a better future—that people can and do overcome the barriers and obstacles that confront them.

**RESILIENCY:** Resiliency means the personal and community qualities that enable us to rebound from adversity, trauma, tragedy, threats, or other stresses – and to go on with life with a sense of mastery, competence, and hope.

# Strategic Plan

In 2008, DMH developed its first Strategic Plan in order to set clear goals and objectives for our future. This plan continues to be a road map for the public mental health system as we focus on moving towards enhancing our community-based system of care. People are the heart of the public mental health system and our mission is to make a difference in their lives. Using the mission, vision, and values, the Board of Mental Health developed five-year goals to address the transformation of the DMH service system. These goals address the key issues of accountability/efficiency, a person-centered and person-driven system, access, community services and supports, outcomes, partnerships, and information management.

The goals are as follows:

- GOAL 1** To increase access to community-based care and supports for adults and children with mental illness and/or substance use disorders through a network of service providers that are committed to a person-centered and recovery-oriented system of care
- GOAL 2** To increase access to community-based care and supports for people with intellectual and/or developmental disabilities through a network of service providers that are committed to a person-centered system of care
- GOAL 3** To ensure people receive quality services in safe settings and utilize information/data management to enhance decision making and service delivery

The goals and objectives will guide DMH's actions in moving toward a community-based service system. Each goal's objectives include outcomes, strategies, outputs, timelines, and responsible parties.

# Services/Supports Overview

The Mississippi Department of Mental Health (DMH) certifies, provides and/or financially supports a network of services for people with mental illness, intellectual/developmental disabilities, substance use disorders, and Alzheimer's disease and/or other dementia. It is our goal to improve the lives of Mississippians by supporting a better tomorrow...today.

**The mental health service delivery system is comprised of three major components:** 1) state-operated programs, 2) regional community mental health centers, and 3) other nonprofit/profit service organizations.

The overall statewide administrative functions are the responsibility of the DMH Central Office. The management team is led by the Executive Director and programmatic and administrative bureaus. DMH directly operates four behavioral health programs, one mental health community living program, a specialized behavioral health program for youth, five programs for persons with intellectual and developmental disabilities, and one specialized program for adolescents with intellectual and developmental disabilities. The programs serve designated counties or service areas and offer a range of inpatient, residential, and community-based services and supports.

## Community Services

A variety of community services and supports are available through DMH certified providers. Services are provided to adults with mental illness, children and youth with serious emotional disturbances, children and adults with intellectual/developmental disabilities, persons with substance use disorders, and persons with Alzheimer's disease or dementia.

For more information about services and providers in your area, contact the DMH Office of Consumer Support at 1.877.210.8513 or visit [www.dmh.ms.gov](http://www.dmh.ms.gov).

**The types of services offered through DMH's certified providers vary according to location but statewide include:**

### **Services for Adults with Mental Illness**

- Crisis Stabilization Programs
- Psychosocial Rehabilitation
- Consultation and Education Services
- Emergency Services
- Pre-Evaluation Screening/Civil Commitment Exams
- Outpatient Therapy
- Targeted Case Management
- Acute Partial Hospitalization
- Elderly Psychosocial Rehabilitation
- Peer Support Services
- Community Support Services
- Assertive Community Treatment
- Crisis Services
- Supervised Housing
- Physician/Psychiatric Services
- SMI Homeless Services
- Drop-In Centers
- Day Support
- Individual and Family Education and Support

### **Alcohol and Drug Services**

- Withdrawal Management Services
- Prevention Services
- Chemical Dependency Units
- Primary Residential Services
- Outpatient Services

- Transitional Residential Services
- DUI Diagnostic Assessment Services
- Recovery Support Services
- Specialized Residential Services for Pregnant/Parenting Women
- Opioid Treatment Services

### **Services for Children and Youth with Serious Emotional Disturbance**

- Therapeutic Group Home
- Treatment Foster Care
- Prevention/Early Intervention
- Crisis Services
- Crisis Residential
- Targeted Case Management
- Peer Support (Family & Youth)
- Community Support Services
- Day Treatment
- Outpatient Therapy
- Physician/Psychiatric Services
- MAP (Making A Plan) Teams
- Family Education and Support
- Wraparound Facilitation
- Intensive Outpatient Psychiatric Services

### **Services for People with Alzheimer's Disease and Other Dementia**

- Adult Day Services
- Caregiver Training

### **Services for People with Intellectual/Developmental Disabilities**

- Early Intervention
- Work Activity Services
- Supported Employment Services

- Transition Services
- Diagnostic and Evaluation Services
- ID/DD Waiver Home and Community Supports
- ID/DD Waiver Community Respite
- ID/DD Waiver Job Discovery
- ID/DD Waiver Host Homes
- ID/DD Waiver Transition Assistance
- IDD Targeted Case Management
- IDD Community Support Program (Day Habilitation, Supported Employment, Prevocational Services)
- ID/DD Waiver Behavior Support
- ID/DD Waiver In-Home Nursing Respite
- ID/DD Waiver Crisis Support
- ID/DD Waiver Day Services - Adult
- ID/DD Waiver Prevocational Services
- ID/DD Waiver Support Coordination
- ID/DD Waiver Supervised Living
- ID/DD Supported Living
- ID/DD Crisis Intervention
- ID/DD Waiver Occupational, Physical, and Speech/Language Therapies
- ID/DD Waiver Specialized Medical Supplies

through DMH's behavioral health programs vary according to location but statewide include:

- Acute Psychiatric Care
- Intermediate Psychiatric Care
- Continued Treatment Services
- Adolescent Services
- Nursing Home Services
- Medical/Surgical Hospital Services
- Forensic Services
- Alcohol and Drug Services

## **IDD Program Services**

The types of services offered through DMH's regional programs for people with intellectual/developmental disabilities vary according to location but statewide include:

- ICF/IID Residential Services
- Psychological Services
- Social Services
- Medical/Nursing Services
- Diagnostic and Evaluation Services
- Community Services Programs
- Special Education
- Recreation
- Speech/Occupational/Physical Therapies
- Vocational Training
- Employment Services

## **Behavioral Health Program Services**

The types of services offered

# What is Mental Illness?

A mental illness is a health condition that causes changes in a person's thinking, mood or behavior. It is sometimes easy to forget that our brain, like all of our other organs, is vulnerable to disease. Mental illness is a health condition just like diabetes or asthma is a health condition. Mental illnesses are more common than cancer and heart disease combined. One in five people will experience a mental illness during their lifetime, and one family in four has a member who is mentally ill and who will require some type of treatment. Good mental health is an essential component of good physical health.

## How Do I Get Help?

DMH is dedicated to providing services in the least restrictive environment possible. Many mental disorders and illnesses can be successfully treated within your community at local behavioral health providers. Other

people may need hospitalization. Contact your local community service provider, and staff will explain the treatment possibilities there. An assessment will occur and will determine if there is a need for mental health services, such as medication, individual and/or family therapy, psychosocial rehabilitation services (therapeutic activities in a day program which can help people achieve/maintain as much independence in daily life as possible), residential services, and family or consumer education. If necessary, staff may guide you or the person you are concerned about through the process for hospitalization. This process might include civil commitment at one of the four state behavioral health programs. Private providers in your area may also provide treatment alternatives. If you think you or someone you know may need help, don't hesitate to reach out. Help is available and recovery is possible.

**For more information, visit [www.dmh.ms.gov](http://www.dmh.ms.gov) or call DMH's Toll-Free Helpline at 1.877.210.8513.**

# State-Run Behavioral Health Programs

The state's behavioral health programs are administered by the Department of Mental Health. These programs offer residential and/or community services for mental health, substance use disorders, and Alzheimer's disease and other dementia.

## State-Run Behavioral Health Programs

# What is an intellectual and/or developmental disability?

An intellectual disability is characterized by limitations in intellectual functioning and difficulties in a variety of everyday social and practical skills. A developmental disability is attributed to a cognitive or physical impairment that results in limitations in area such as self-care, language, and mobility. The term IDD covers a broad range of disorders and syndromes.

## What help is available?

DMH is responsible for the development and implementation of services to meet the needs of people with intellectual and developmental disabilities. This public service delivery system is comprised of five state operated comprehensive regional programs, a state operated

program for youth who require specialized treatment, 14 regional community mental health/IDD centers and other non-profit community agencies/organizations that provide community-based services.

Community Services are available throughout the state for people with intellectual and developmental disabilities. Community Services include assistive technology services, case management, diagnostic and evaluation services, early intervention, work activity, employment services, and Home and Community- Based (HCBS) ID/DD Waiver services. Waiver services may include home and community supports, respite care (in-home nursing, community and ICF/IID), adult day services, supervised living, prevocational services, supported employment, physical therapy, occupational therapy, speech/ language/hearing therapy, behavior support/intervention, specialized medical supplies, supported living arrangement services, host homes, job discovery, crisis support/intervention, specialized medical supplies, and transition assistance.

**For more information, visit [www.dmh.ms.gov](http://www.dmh.ms.gov) or call DMH's Helpline at 1.877.210.8513.**

# What is the Intellectual Disabilities/ Developmental Disabilities Waiver (ID/DD Waiver)?

Mississippi's ID/DD Waiver provides individualized supports and services to assist people in living successfully at home and in the community and are an alternative to care in institutional settings. These Medicaid funded supports and services are available as long as the cost of supporting people in the home or community does not exceed the cost of caring for them in institutional settings. The ID/DD Waiver includes an array of services aimed at assisting people to live as independently as possible in their homes and communities. Services include: Supported Employment, Home and Community Supports, Supervised Living, Adult Day Services, In-Home Nursing Respite, Community Respite, Prevocational Services, Specialized Medical Supplies, Speech, Occupational and Physical Therapy, Host Homes, Job Discovery, Crisis Intervention, Supported Living, Behavior Support, and Transition Assistance.

To access ID/DD Waiver services, contact the appropriate ID/

DD regional program (see map on page 17) to arrange for an evaluation. When persons are determined to meet the same level of care criteria as someone applying for admission to an institution, they have the option to have their names placed on the ID/DD Waiver Planning List. Before they can be enrolled from the Planning List, they must be determined eligible for Medicaid. If a person meets the requirements for enrollment in the ID/DD Waiver, his or her Support Coordinator from the ID/DD program will assist in developing a Plan of Services and Supports. The person-centered Plan of Services and Supports will outline the type and amount of ID/DD Waiver services a person is requesting, as well as the outcomes he or she wishes to achieve. The person must also indicate choices of a provider for all services. The request must be approved by the Bureau of Intellectual and Developmental Disabilities (BIDD). The person will be notified of the type and amount of service BIDD approves on the Plan of Services and Supports. At that point, the Support Coordinator will notify the chosen agency that the person has been approved to receive services and services will begin.

**For more information, visit [www.dmh.ms.gov](http://www.dmh.ms.gov) or call DMH's Helpline at 1.877.210.8513.**

# State-Run Programs for Persons with Intellectual & Developmental Disabilities

The IDD regional programs for persons with intellectual and developmental disabilities provide comprehensive residential care as licensed, intermediate care programs for persons with intellectual disabilities. In addition to providing a supervised 24-hour setting, the regional programs provide active treatment for people living there. The comprehensive program locations for persons with developmental disabilities are also a primary vehicle for delivering community services in various counties throughout Mississippi. In the community setting, the regional programs provide assistive technology services and alternative living arrangements, including group homes, supervised apartments, specialized homes for the elderly, and supported living. These programs also provide diagnostic and evaluation services, employment services, early intervention services, and case management services.

## State-Run Programs for Persons with Intellectual/Developmental Disabilities

# Alcohol & Drug Use Services

DMH administers the public system of alcohol and drug use prevention and treatment

services in Mississippi through the Bureau of Alcohol and Drug Services. A variety of outpatient and community-based residential alcohol and drug use prevention and treatment services are provided through a statewide network, which includes state-operated programs,

regional community mental health centers, and other community-based programs. DMH's goal is for each mental health region to have a full range of treatment options available for the citizens in its region. A system of services for alcohol and drug use prevention and treatment was designed to reflect the philosophy that alcohol and drug use is a treatable and preventable illness. The overall goal of this system is to provide a person-centered

continuum of community-based, accessible services. The services include prevention,

outpatient, withdrawal management, community-based primary and transitional treatment, inpatient, and recovery and support services. All community services are provided through a grant/ contract with other state agencies, local public agencies, and other organizations.

The following services are provided in each mental health region: prevention services, employee assistance programs, individual, group, and family counseling, recovery support services, primary residential services (including withdrawal management), transitional residential services, vocational counseling, and emergency services (including a 24-hour hotline). Many regions also have available a 10-week intensive alcohol and drug outpatient program for people

who are in need of treatment but are still able to maintain job or school responsibilities.

The Department of Mental Health's inpatient chemical dependency units are located at Mississippi State Hospital in Whitfield and East Mississippi State Hospital (EMSH) in Meridian. The chemical dependency unit at EMSH is a 25-bed unit for adult males with substance use disorders who reside in the hospital's service area. EMSH also provides chemical dependency treatment and dual diagnosis (mental illness and substance use) treatment for adolescent males. The chemical dependency service at Mississippi State Hospital consists of two units with a total of 80 active beds. The units provide treatment for adult men and women with alcohol and/or drug problems. Individuals in need of treatment are encouraged to seek treatment in their communities, as admission to these services is handled through the court commitment process and is reserved for those in need of hospital-based treatment.

**For more information about alcohol and drug use services, visit [www.dmh.ms.gov](http://www.dmh.ms.gov) or call DMH's Helpline at 1.877.210.8513.**

# Alzheimer's Disease & Other Dementia

DMH is responsible for the development of Adult Day Programs for people with Alzheimer's disease and other forms of dementia, and counseling, education and training for family members, caregivers and service providers. Currently, more than 51,000 Mississippians live with Alzheimer's disease.

Current projects include the funding of two adult day programs:

- Footprints Adult Day Services, Newton, MS  
601.683.4320
- Garden Park Adult Day Program, Greenwood, MS  
662.451.9058

Training can be customized at no charge for professionals, caregivers and service providers.

**For more information about Alzheimer's Disease and other Dementia, visit [www.dmh.ms.gov](http://www.dmh.ms.gov) or call DMH's Helpline at 1-877-210-8513.**

# Crisis Stabilization Units

The role of the Crisis Stabilization Units in the regional mental health system is to provide stabilization and treatment services to persons who are in psychiatric crisis. Many people with mental illness can be treated in the center and return to the community without an inpatient admission to a state psychiatric hospital. The more quickly a person receives treatment, the less likely his or her condition will worsen. A person can receive involuntary and voluntary treatment at a Crisis Stabilization Unit. In addition, a person will be connected with his or her local Community Mental Health Center.

# Crisis Stabilization Units

# Community Mental Health Centers

Regional community mental health centers (CMHCs) operate under the supervision of regional commissions appointed by county boards of supervisors comprising their respective service areas. The 14 CMHCs make available a range of community-based mental health, substance use, and in some regions, intellectual/developmental disability services. CMHC governing authorities are considered regional and not state-level entities. DMH is responsible for certifying, monitoring, and assisting CMHCs. CMHCs are the primary service providers with whom DMH contracts to provide community-based mental health and substance use services.

# CMHC Regional Map

# Mobile Crisis Response Teams

Mobile Crisis Response Teams provide community-based crisis services that deliver solution-focused and recovery-oriented behavioral health assessments and stabilization of crisis in the location where the individual is experiencing the crisis. Mobile Crisis Response Teams (MCeRTs) work hand-in-hand with local law enforcement, Chancery Judges and Clerks, and the Crisis Stabilization Units to ensure a seamless process. The teams ensure a person has a follow-up appointment with his or her preferred provider and monitor that person until the appointment takes place.

MCeRTs are coordinated through the local Community Mental Health Centers. Contact your local CMHC or please see below for Mobile Crisis Response Team contact information.

CMHC	Agency Crisis Number
Region 1	888.404.8002
